Fundraising organization and background :

Asbury Methodist Social Service, established for more than 50 years, has been providing a diverse range of services that cater to the needs of individuals from different sectors of the society. With the understanding of the increasing difficulties faced by disadvantaged families, the Asbury Methodist Social Service provides special physical and psychological support to poor families living in subdivided flats and partitioned flats. In response to concerns over the circumstances faced by students with special education needs, efforts have been made to develop the Integrated Education and Training Programme. The programme is specially designed to provide students with special education needs with appropriate services and training, to relieve pressure from the difficulties they face in learning and effectively increase their learning capacity.

Students and parents who would like to participate in the Parent and Student Flag Day should complete and sign the reply slip below. The reply slip is to be returned to the school's general office by the student.
